

Safe. In any way. SUREPLAY® Splash

SUREPLAY® Splash is a water-permeable surface system, specially developed for waterplay systems. It is installed manually on site without any joints.

The Splash surface system can easily be adjusted to individual requirements. Besides ideal antislip properties, the textured and grippy structure of rubber granules offers an individual surface, particularly pleasant to walk on.

Choosing a particular grain size for the EPDM granules and the right coating method determines the sealed surface's antislip properties and design. Its set-up height varies depending on specifications and individual requests. We can individually adjust the Splash multilayer system according to your requirements. The set-up height varies according to specifications and individual request.

Top layer EPDM granules are available in 24 colours that can additionally be combined to various blends.

- Fall height: max. 3 m
- Set-up height: max. 100 mm
- Base layer: max. 90 mm recycling granules
- Wear layer: max. 10 mm EPDM granules
- Standards: DIN EN 1176:2008 and ASTM F 1292-04

SUREPLAY® Splash Indoor for indoor use

SUREPLAY® Splash Indoor ist tested and certified according to EN ISO 11925-2:2010 and EN ISO 9239 1:2010 in regard to fire behaviour as well as classified according to EN 13501-1:2010: Bfl -s1 (old designation: B1 DIN 4102, low flammability). Classification of floor coverings according to the German DIN 51130

- determination of the anti-slip property
- workrooms and fields of activities with slip danger, walking method
- inclined plane R10 class

Test result for workrooms and fields with a risk of slippage

ANTI-SLIP FACTOR	R9	R10	R10	R10	R10
INCLINATION ANGLE	>6°-10°	>10°-19°	>19°-27°	>27°-35°	>35°
ADHESION FRICTION COEFFICIENT	low	average	increased	large	very large

- Meets DIN EN 1176
- Slip resistant
- Flame retardant
- Environmentally compatible
- Hygienic
- Weather resistant
