

Flexible. At every step. SUREPLAY® Sprint 400

SUREPLAY® Sprint 400 is the ideal surface from school or club sports to high-performance athletics. The surfacing system can be classified IAAF-conformably. This SUREPLAY® sports surface is a jointless, water-impermeable all-weather outdoor-surface.

For massive coatings or solid plastic surfaces with 2-K PU-coating made of rubber granules we exclusively use highly elastic and durable material components.

SUREPLAY® Sprint 400 is installed water-permeable as a two-part sandwich system with a recycling rubber base layer and a poured top layer with interspersed EPDM granules. The base layer made of SBR recycling varies in set-up height from 10 to 25 mm with a poured top layer of about 3 mm.

The environmental impact assessment has been carried out and certified according to DIN V 18035-6. The surface system has antislip properties according to the German DIN V 18035-6.

Set-up height:	max. 28 mm SBR recycling granules
Base layer:	max. 25 mm SBR recycling granules
Wear layer:	max. 3 mm poured top layer with interspersed EPDM granules
Standards:	DIN V 18035-6

Meets DIN V 18035-6

Slip resistant

Environmentally compatible

Hygienic

Weather resistant
